

## DJI FPV Release Notes

---

Date:	2021.07.15
Aircraft Firmware:	v01.02.0000
Goggles Firmware:	v01.02.0001
Remote Controller firmware:	v01.02.0000
DJI Fly App iOS:	v1.4.8
DJI Fly App Android:	v1.4.8

---

### What 's New?

- Fixed rare issue: goggles restarted automatically when in DJI Digital FPV System mode.

### Notes:

- Restart the aircraft, remote controller, and goggles after the update is complete.
- Note that the update may reset various flight parameters such as the RTH altitude and the maximum flight distance. Before updating, take note of your preferred settings and readjust them after the update.
- If the update fails, restart aircraft, remote controller, goggles, and DJI Fly or DJI Assistant 2 (DJI FPV series), and retry.

## DJI FPV Release Notes

---

Date:	2021.06.15
Aircraft Firmware:	v01.02.0000
Goggles Firmware:	v01.02.0000
Remote Controller firmware:	v01.02.0000
DJI Fly App iOS:	v1.4.3
DJI Fly App Android:	v1.4.3

---

### What's New?

- Added ability to enable or disable video subtitles under camera settings in goggles.
- Added ability to trigger Find My Drone by pressing Mode button and Brake button simultaneously on the motion controller.
- Added flashing auxiliary bottom light when Find My Drone is triggered.
- Added ability to start or stop motors in Manual mode when customizing C2 switch under control settings in goggles.
- Added ability to view HDMI live broadcast by connecting the goggles to the DJI Smart Controller (v01.00.07.00 or above required). By connecting the goggles to the DJI Smart Controller using USB-C cable, users can see the camera view of the aircraft on the screen of the Smart Controller and can transmit the live view from the Smart Controller to other display devices through an HDMI cable.
- Optimized hints on goggles for updates, Manual mode limitations, and motion controller critical low battery warnings.
- Optimized flight safety.
- Optimized flight experience when using Manual mode.
- Optimized flight experience when using motion controller.

### Notes:

- Restart the aircraft, remote controller, and goggles after the update is complete.
- Note that the update may reset various flight parameters such as the RTH altitude and the maximum flight distance. Before updating, take note of your preferred settings and readjust them after the update.
- If the update fails, restart aircraft, remote controller, goggles, and DJI Fly or DJI Assistant 2 (DJI FPV series), and retry.
