Compliance with Regulations & Flight Limits

WARNING

- DO NOT fly over densely populated areas. DO NOT fly in integrated airspace unless approved by air traffic management authorities.
- DO NOT operate in the vicinity of manned aircraft. Be alert and avoid other aircraft at all times. Land immediately if necessary.
- DO NOT fly the aircraft without authorization in areas prohibited by local laws. All GEO Zones are listed on the DJI official website at <https://fly-safe.dji.com/nz/qfz-query>. In compliance with the relevant laws, policies, and regulations, some GEO zones will not appear on the map on the website. Refer to the DJI Delivery app for a complete map of GEO zones in effect.
- DO NOT use the aircraft to carry illegal or dangerous goods or payloads. DO NOT use this product for any illegal or inappropriate purpose such as spying, military operations, or unauthorized investigations.
- Do not fly higher than 120 m (400 ft)* above ground level and stay away from any surrounding obstacles.

* Flight altitude restrictions vary in different regions. DO NOT fly above the maximum altitude set forth in your local laws and regulations. Refer to the User Manual for additional limitations.

Flight Environment Restrictions

WARNING

- During takeoff, landing, and flight, keep away from roads, railways, water surfaces, and obstacles such as utility poles, high-voltage lines, and trees. Maintain a safe distance of more than 6 m from crowds and animals. Only fly in open areas.
- DO NOT use the aircraft in severe weather conditions including strong winds, snow, ice, fog, and lightning. Make sure to follow the IP rating requirements when flying in the rain.
- DO NOT fly the aircraft in conditions with a weak GNSS signal, such as indoors, and in environments unsuitable for the Sensing System positioning, such as significant altitude, surfaces with weak textures like water, snow, or plain-colored walls.

NOTICE

- The performance of the aircraft and its battery is limited when flying at high altitudes. Fly with caution.
- In low temperature environments, make sure that the flight battery is fully charged and be sure to reduce the payload of the aircraft. Otherwise, it will affect the flight safety or a takeoff limit will occur.
- DO NOT use the aircraft near accidents, fire, explosions, floods, tsunamis, avalanches, landslides, earthquakes, dust, or sandstorms.
- To avoid affecting the flight performance and motor service life, DO NOT takeoff or land the aircraft on sandy or dusty surfaces.
- Be extremely alert when flying near areas with magnetic or radio interference. Pay close attention to the video transmission quality and signal strength on DJI Delivery App. Return to the Home Point and land the aircraft if prompted to do so in DJI Delivery App to ensure flight safety. Sources of electromagnetic interference include but are not limited to: high voltage lines, large-scale power transmission stations or mobile base stations, and broadcasting towers.
