

DJI Goggles Integra Release Notes

Date:	2023.03.28
DJI Goggles Integra Firmware:	v01.01.0000
DJI RC Motion 2 Firmware:	v01.01.0000
DJI Avata Firmware:	v01.03.0000
DJI FPV Remote Controller 2 Firmware:	v02.00.0600
DJI Motion Controller Firmware:	v02.00.0600
DJI O3 Air Unit Firmware:	v01.02.0000
DJI FPV Air Unit Module Firmware:	v01.01.0000
DJI Fly App Version:	v1.9.8 (iOS & Android)

What's New?

- Added support to use with DJI FPV Air Unit Module.
- Added functionality to erase all user data generated and stored on the aircraft during flight when used with DJI Avata. To use the function, open the goggles menu and select **Settings>About>Clear All Data**.
- When used with DJI Avata, RTH altitude prompt was added after updating the Home Point.
- When used with DJI Avata, the low battery RTH countdown was increased to 15 seconds.
- Added support for Betaflight 4.4 HD OSD when used with DJI O3 Air Unit or DJI FPV Air Unit Module.
- Optimized the visual prompts when remote control or image transmission signals are weak.

Notes:

- Restart the aircraft (or air unit), remote controller, and goggles after the update is complete.
- Note that the update may reset various flight parameters such as the RTH altitude and the maximum flight distance. Before updating, take note of your preferred settings and readjust them after the update.
- If update fails, restart the aircraft (or air unit), remote controller, goggles, and DJI Fly or DJI Assistant 2 (Consumer Drones Series) and try again.
