DJI Osmo Action 3 Release Notes

Date:	2022.11.30
Firmware Version:	v01.02.10.10
DJI Mimo App iOS:	v1.8.6
DJI Mimo App Android:	v1.8.4

What's New

- Added HDR Video in shooting mode for wider dynamic range (10bit video and Enhanced Image Quality are enabled by default when recording HDR Video).

- Added shooting 10bit video in D-Cinelike mode, providing wider color grading for post-production (Only available for certain resolutions and frame rates).

- Added Enhanced Image Quality in video shooting mode, extending the dynamic range and displaying more highlight and shadow details (Only available for certain resolutions and frame rates).

- Added Timecode for synchronization. When using Timecode, Osmo Action 3 can be synchronized by the system settings or the time code synchronizer. This improves the post-production efficiency when shooting with multiple cameras.

- Added OTG (USB On-the-GO) connection. Android devices can connect to the camera to transfer files.

- Added RockSteady+ for better stabilization.

- Added support for 16:9 vertical display livestream.

- Added Narrow option for FOV.

- Added options for Auto Power Off. 1 min and 2 min are now available.

- Added support for Arabic in camera system settings.

Notes:

Custom Mode settings will be reset after the firmware update.

If the update fails, follow the steps for troubleshooting.

1. Restart Osmo Action 3 and DJI Mimo.

2. Enable Wi-Fi and Bluetooth on the mobile device.

3. Connect Osmo Action 3 to DJI Mimo and try the update again.

Contact DJI Support if the update fails again.
