

## DJI RS 5 Release Notes

---

Date:	2026.01.21
Firmware Version:	V01.01.00.08
DJI RS Enhanced Intelligent Tracking Module:	V01.00.03.07
DJI Ronin App iOS:	V2.1.0
DJI Ronin App Android:	V2.1.0
User Manual:	V1.0

---

### What's New

- Added support for DJI RS Enhanced Intelligent Tracking Module. When the module is detected in an inverted orientation, ActiveTrack view on the RS 5 touchscreen will rotate automatically.
- Added support for battery update.
- Optimized ActiveTrack performance when RS 5 is used with DJI RS Enhanced Intelligent Tracking Module.

### Notes:

- Make sure that the DJI Ronin app is the latest version when updating the firmware.
- Motor parameters are reset after updating firmware. Make sure to auto calibrate the gimbal.
- Update the firmware using the DJI Ronin app by connecting the gimbal via Bluetooth. DO NOT disconnect the DJI Ronin app and the gimbal during the update process.
- If the gimbal has a camera attached and is powered on while updating the firmware, make sure to protect the camera and lens as the motors will power off during the update.

If the firmware update fails, restart the gimbal and retry.
