

Guidelines for DJI Terra Offline License

Install CodeMeter Software

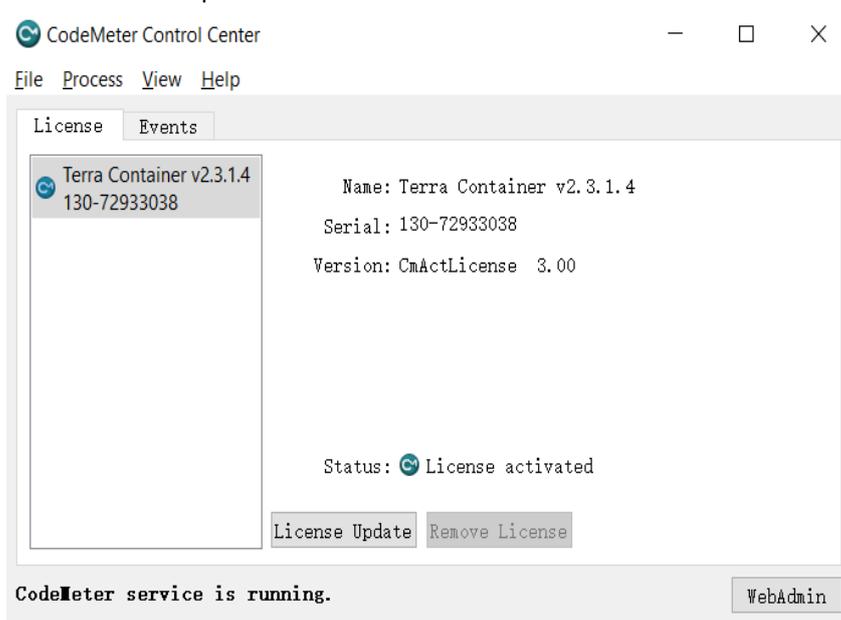

Click to download the [Wibu installation](#) file. Run the installation file and follow the onscreen instructions to install CodeMeter. Or, after installing DJI Terra, go to its installation folder, then go to CodeMeter > Installer and run CodeMeterRuntime.exe.

Create a License Request (.WibuCmRaC file)

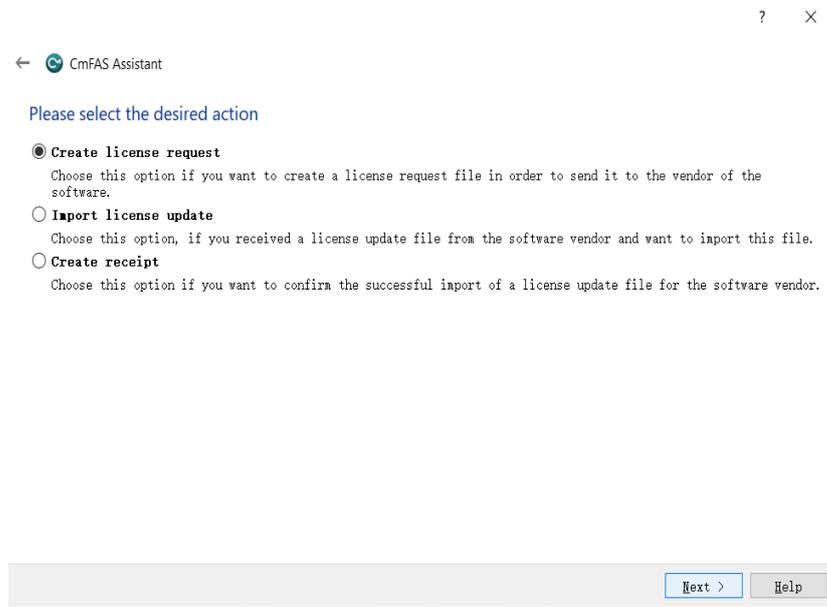

1. Install [DJI Terra](#). Go to the installation folder and then go to CodeMeter > LIF. Double-click to import Terra_license.WibuCmLIF and wait for the process to complete. The figure below shows the notification for successful LIT file import.

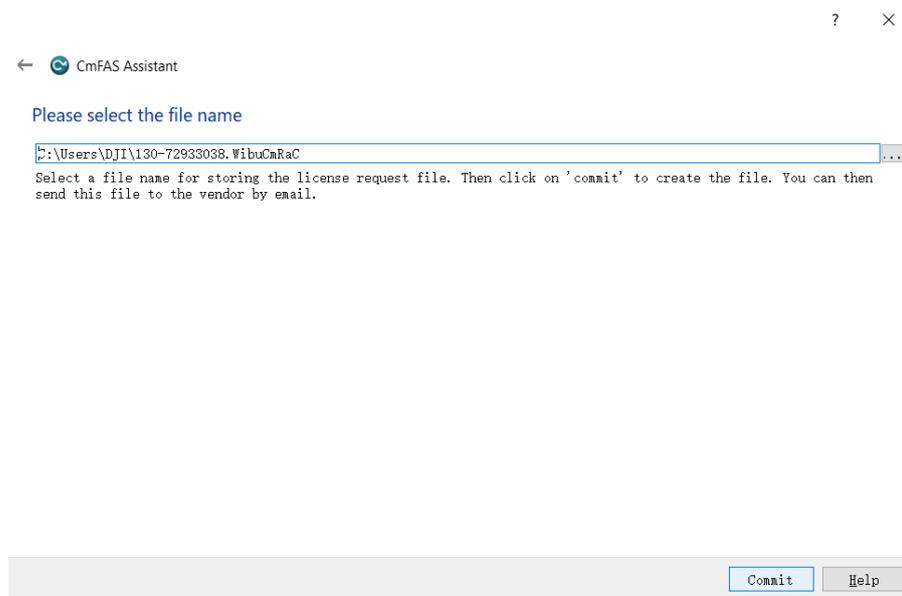

2. Launch CodeMeter, follow the instructions below, and a RAC file will be generated.
 - a. Click License Update.

b. Select Create License Request and click Next.

c. Specify a file name as illustrated and click Commit.

Please note:

1. The RAC file must be generated to the device that will be bound with DJI Terra. Otherwise, the license request may not be generated correctly.
2. After generating the RAC file, do not change the device's motherboard, CPU, or hard drive. Otherwise, the authorization license will become invalid.

License Exchange

1. Go to [the License Exchange page](https://terra-license.djiservice.org/) (https://terra-license.djiservice.org/) and enter your email, your dealer's email, exchange code, and the license request (the .WibuCmRaC file).

License File

2. Click Next to complete license exchange. Wait for an email notification indicating license exchange was successful.

Import Authorization License

1. After receiving the email, download the attached authorization license (a .WibuCmRaU file), copy and paste it onto the device will be bound to DJI Terra, which should be the same device you used to create the license request.
2. Double-click to import the authorization license and wait for the process to complete.

- When the license is imported successfully, launch DJI Terra, and click Offline Login to start using DJI Terra's paid features offline.
