DJI Inspire 3 Release Notes

Date: 2023.11.07
Aircraft Firmware: v01.00.05.00
Remote Controller Firmware: v02.04.04.00
Intelligent Battery Firmware: v04.01.00.64
Charging Hub Firmware: v05.02.13.46
Zenmuse X9-8K Air Firmware: v01.00.23.00
DJI Pilot 2 App: v5.3.1.1
DJI Assistant 2 (DJI Inspire Series): v2.0.1

Firmware Upgrade Method:
Aircraft: DJI Assistant 2 / DJI Pilot 2
Remote Controller: DJI Assistant 2 / DJI Pilot 2
DJI Pilot 2 app: will be updated with the remote controller firmware
Charging Hub: DJI Pilot 2 (Connect the Charging Hub to the remote controller and update it on the HMS page in the DJI Pilot 2 app.)

What’s New
• Added Vision Assist.
• Added Preflight Check.
• Added Cruise Control.
• Added Timed Shot.
• Added Edit Flight.
• Added Standby at Start Point when using Repeatable Routes mode.
• Added support to display propulsion system status when using Sport mode or Attitude mode.
• Added support to automatically detect the propeller guard installation status when the aircraft takes off.
• Added support to add files to My Favorites when using Album.
• Added support to start/stop recording and enable/disable auto focus using the button on DJI Three-Channel Follow Focus when the remote controller and remote monitor are connected using cables.
• Added support to display altitude detected by the downward infrared sensing system in all flight modes.
• Added support to display horizontal obstacle information when using Sport mode.
• Added support to record Camera Index and Reel Count to the metadata.
• Added vibration notification to the remote controller when the aircraft is hovering after takeoff.
• Updated Smart Return to Home to maintain the previous settings after the remote controller is powered on.
• Fixed some minor bugs.
