DJI Inspire 3 Release Notes

Date:	2025.07.30
Aircraft Firmware:	v01.00.08.00
Remote Controller Firmware:	v05.04.09.00
Intelligent Battery Firmware:	v04.01.00.65
Charging Hub Firmware:	v05.02.13.46
Zenmuse X9-8K Air Firmware:	v01.00.27.47
DJI Pilot 2 App:	v5.6.1.2
DJI Assistant 2 (DJI Inspire Series):	v2.0.1
	Aircraft: DJI Assistant 2 / DJI Pilot 2
	Remote Controller: DJI Assistant 2 / DJI Pilot 2
Firmware Upgrade Method:	DJI Pilot 2 app: will be updated with the remote controller firmware
	Charging Hub: DJI Pilot 2 (Connect the Charging Hub to the remote controller and update it on the HMS page in the DJI Pilot 2 app.)

What's New

- Added support for Viltrox AF 90mm F3.5 Air DL Lens.

- Added screen lock feature.

- Fixed some minor bugs.

Notes:

- If the update fails, restart aircraft, remote controller, and DJI Pilot 2 or DJI Assistant 2 (DJI Inspire Series), and retry.

DJI Inspire 3 Release Notes

Date:	2024.09.03
Aircraft Firmware:	v01.00.07.00
Remote Controller Firmware:	v05.04.08.00
Intelligent Battery Firmware:	v04.01.00.65
Charging Hub Firmware:	v05.02.13.46
Zenmuse X9-8K Air Firmware:	v01.00.26.45
DJI Pilot 2 App:	v5.5.1.4
DJI Assistant 2 (DJI Inspire Series):	v2.0.1
	Aircraft: DJI Assistant 2 / DJI Pilot 2
	Remote Controller: DJI Assistant 2 / DJI Pilot 2
Firmware Upgrade Method:	DJI Pilot 2 app: will be updated with the remote controller firmware
	Charging Hub: DJI Pilot 2 (Connect the Charging Hub to the remote controller and update it on the HMS page in the DJI Pilot 2 app.)

What's New

- Added support for DJI DL 75 mm F1.8 Lens.

- Added PinPoint mode for Spotlight Pro to support selecting a GPS coordinate point as a subject.

- Added support to enable Dynamic Home Point.

- Added AEB mode as an option when taking photos.

- Added support to set and record gimbal roll angle when using Waypoint Pro.

- Added Adaptive Yaw Speed option to Expo parameters in flight control parameters.

- Added Adaptive Gimbal Speed option to gimbal parameters.

- Added Flight Mode Protection to flight control parameters.

- Added support to display gimbal roll angle in the liveview.

- Added customizing frame guide ratio to Display parameters in Advanced Camera Settings.

- Added support to select audio resource after a monitor is connected to HDMI port of remote controller.

- Added support to copy video cache on remote controller to SD card in Album.

- Added loop code for file names of the footage and folder names to avoid repeated names.

- Updated back view of Vision Assist to non-mirror display.

- Fixed some minor bugs.

Notes:

- If the update fails, restart aircraft, remote controller, and DJI Pilot 2 or DJI Assistant 2 (DJI Inspire Series), and retry.

DJI Inspire 3 Release Notes

Date:	2024.08.01
Aircraft Firmware:	v01.00.06.00
Remote Controller Firmware:	v02.04.06.00
Intelligent Battery Firmware:	v04.01.00.64
Charging Hub Firmware:	v05.02.13.46
Zenmuse X9-8K Air Firmware:	v01.00.23.00
DJI Pilot 2 App:	v5.4.1.5
DJI Assistant 2 (DJI Inspire Series):	v2.0.1
	Aircraft: DJI Assistant 2 / DJI Pilot 2
	Remote Controller: DJI Assistant 2 / DJI Pilot 2
Firmware Upgrade Method:	DJI Pilot 2 app: will be updated with the remote controller firmware
	Charging Hub: DJI Pilot 2 (Connect the Charging Hub to the remote controller and update it on the HMS page in the DJI Pilot 2 app.)

What's New

- Fixed some minor bugs.

Notes:

- If the update fails, restart aircraft, remote controller, and DJI Pilot 2 or DJI Assistant 2 (DJI Inspire Series), and retry.

DJI Inspire 3 Release Notes

Date:	2024.01.17
Aircraft Firmware:	v01.00.06.00
Remote Controller Firmware:	v02.04.05.02
Intelligent Battery Firmware:	v04.01.00.64
Charging Hub Firmware:	v05.02.13.46
Zenmuse X9-8K Air Firmware:	v01.00.23.00
DJI Pilot 2 App:	v5.4.1.3
DJI Assistant 2 (DJI Inspire Series):	v2.0.1
	Aircraft: DJI Assistant 2 / DJI Pilot 2
	Remote Controller: DJI Assistant 2 / DJI Pilot 2
Firmware Upgrade Method:	DJI Pilot 2 app: will be updated with the remote controller firmware
	Charging Hub: DJI Pilot 2 (Connect the Charging Hub to the remote controller and update it on the HMS page in the DJI Pilot 2 app.)

What's New

- Added support for civil uncrewed aircraft owners to register their aircraft with CAAC using their real names to comply with the uncrewed aircraft-related regulations in China.

- When connecting to the DJI High-Bright Remote Monitor, added the ability to control focus, aperture, and start/stop recording through the Right Hand Grip or DJI Three-Channel Follow Focus without obtaining the gimbal control.

Notes:

- If the update fails, restart aircraft, remote controller, and DJI Pilot 2 or DJI Assistant 2 (DJI Inspire Series), and retry.

DJI Inspire 3 Release Notes

Date:	2023.11.07
Aircraft Firmware:	v01.00.05.00
Remote Controller Firmware:	v02.04.04.00
Intelligent Battery Firmware:	v04.01.00.64
Charging Hub Firmware:	v05.02.13.46
Zenmuse X9-8K Air Firmware:	v01.00.23.00
DJI Pilot 2 App:	v5.3.1.1
DJI Assistant 2 (DJI Inspire Series):	v2.0.1
	Aircraft: DJI Assistant 2 / DJI Pilot 2
	Remote Controller: DJI Assistant 2 / DJI Pilot 2
Firmware Upgrade Method:	DJI Pilot 2 app: will be updated with the remote controller firmware
	Charging Hub: DJI Pilot 2 (Connect the Charging Hub to the remote controller and update it on the HMS page in the DJI Pilot 2 app.)

What's New

- Added Vision Assist.

- Added Preflight Check.

- Added Cruise Control.

- Added Timed Shot.

- Added Edit Flight.

- Added Standby at Start Point when using Repeatable Routes mode.

- Added support to display propulsion system status when using Sport mode or Attitude mode.

- Added support to automatically detect the propeller guard installation status when the aircraft takes off.

- Added support to add files to My Favorites when using Album.

- Added support to start/stop recording and enable/disable auto focus using the button on DJI Three-Channel Follow Focus when the remote controller and remote monitor are connected using cables.

- Added support to display altitude detected by the downward infrared sensing system in all flight modes.

- Added support to display horizontal obstacle information when using Sport mode.

- Added support to record Camera Index and Reel Count to the metadata.

- Added vibration notification to the remote controller when the aircraft is hovering after takeoff.

- Updated Smart Return to Home to maintain the previous settings after the remote controller is powered on.

- Fixed some minor bugs.
