1. Download the DJI GO 4 App and Watch the Tutorial Videos

Search for ‘DJI GO 4’ on the App Store or Google Play, or scan the QR code to download the app on your mobile device. Watch the tutorial videos at www.dji.com or in the DJI GO 4 App.

DJI GO 4 app and more information

⚠️ DJI GO 4 supports iOS 9.0 (or later) or Android 4.4 (or later).

2. Check the Battery Levels

Low  • Battery Level  → High

Press once to check the battery level. Press once, then again and hold to turn on/off.

BAT 100 PCT
Battery Level: 100%

Press once to check the battery level on LCD screen. Press once, then again and hold to turn on/off the remote controller.
3. Charge the Batteries

![Image of charging process]

Remove Intelligent Flight Battery

- Power Outlet 100 - 240V
- Charge Time: ~1 hour 20 minutes
- Charge Time: ~2 hours

4. Prepare the Remote Controller

- Unfold the antennas and the mobile device clamp.
- Place one end of the RC cable to the end of the slot.

- Lightning connector cable (Connected) and Standard Micro USB connector cable included. Use as appropriate.
- USB Type-C connector cable is included. Optional Reverse Micro USB connector cable is available.

- Choose an appropriate RC cable. Do not twist the RC cable.
- The RC cable slider must be replaced if using a USB Type-C RC cable. Refer to the User Manual for RC Cable connection.
5. Prepare the Aircraft

- Remove the gimbal clamp from the camera
- Match propellers to motors
- Press the propeller down firmly and rotate in the lock direction
- Unfold the front arms and the propellers
- Unfold the rear arms and the propellers

**Warning:**
- Unfold the front arms and the propellers before the rear ones. All arms and propellers must be unfolded before takeoff.
- The gimbal cover is used to protect the gimbal. Remove it when necessary.

6. Prepare for Takeoff

- Power on the remote controller
- Power on the aircraft
- Launch the DJI GO 4 app

Use your DJI account to activate the aircraft. Activation requires an internet connection.

**Warning:**
The Mavic Pro can be controlled using the Remote Controller or Virtual Joysticks. Select control modes by toggling the Control Mode Switch. Only toggle this switch when the aircraft is powered off.
7. Flight

The default flight control is known as Mode 2. The left stick controls the aircraft’s altitude and heading, while the right stick controls its forward, backward, left and right movements. The gimbal dial controls the camera’s tilt.

Before taking off, make sure the Aircraft Status Bar in the DJI GO 4 app or on the Remote Controller LCD screen displays ‘Ready to Go’.

Combination stick command to start/stop the motors

- Left stick up (slowly) to take off
- Left stick down (slowly) until you touch the ground. Hold a few seconds to stop the motors

* The motors can only be stopped mid-flight when the flight controller detects critical error.
• Controlling flight with Virtual Joysticks on your mobile device via Wi-Fi

1. Toggle the Control Mode Switch to turn on Wi-Fi
2. Power on the aircraft
3. Launch the DJI GO 4 app and tap the icon on the top right of your screen, then scan the Wi-Fi QR Code on the front arm to start connection
4. Tap Auto Takeoff
5. Fly the aircraft with touch control

   • Turn on your mobile device’s Wi-Fi and enter the Wi-Fi password shown on the front arm to connect to the Mavic network if for any reason you cannot scan the QR code.
   • When using Wi-Fi in a wide open area with no Electro-Magnetic Interference, transmission distance is approximately 262 ft (80 m) at an altitude of 164 ft (50 m).
   • The Wi-Fi frequency of your mobile device can be set to 2.4 Ghz or 5 Ghz. Set your Wi-Fi to 5 Ghz for less interference. Once connected to the Mavic Pro, you can change your Wi-Fi password or reset your Wi-Fi connection. (Refer to the User Manual for more information)

• In the DJI GO 4 App

   Auto Takeoff    Auto Landing    Return-to-Home (RTH)
   ActiveTrack    TapFly       Normal

• Watch the tutorial in the DJI GO 4 app or on the Official DJI website to learn more.
• Always set an appropriate RTH altitude before takeoff. When the aircraft is returning to the Home Point, you should guide it with the control sticks.
8. Fly Safe

- **Fly in Open Areas**
- **Strong GPS Signal**
- **Maintain Line of Sight**
- **Fly Below 400 feet (120 m)**

Avoid flying over or near obstacles, crowds, high voltage power lines, trees or bodies of water. DO NOT fly near strong electromagnetic sources such as power lines and base stations as it may affect the onboard compass.

DO NOT use the aircraft in adverse weather conditions such as rain, snow, fog and wind speeds exceeding 10 m/s or 22 mph.

Stay away from the rotating propellers and motors. Learn more at: http://flysafe.dji.com/no-fly

It's important to understand basic flight guidelines, for the safety of both you and those around you. Don't forget to read the Disclaimer and Safety Guidelines.
