Disclaimer and Warning

Congratulations on purchasing your new DJI™ product. The information in this document affects your safety and your legal rights and responsibilities. Read this entire document carefully to ensure proper configuration before use. Failure to read and follow instructions and warnings in this document may result in serious injury to yourself or others, or damage to your DJI product or damage to other objects in the vicinity. This document and all other collateral documents are subject to change at the sole discretion of DJI. For up-to-date product information, visit http://www.dji.com and click on the product page for this product.

By using this product, you hereby signify that you have read this disclaimer and warning carefully and that you understand and agree to abide by the terms and conditions herein. You agree that you are solely responsible for your own conduct while using this product, and for any consequences thereof. You agree to use this product only for purposes that are proper and in accordance with all applicable laws, rules, and regulations, and all terms, precautions, practices, policies and guidelines DJI has made and may make available.

DJI accepts no liability for damage, injury or any legal responsibility incurred directly or indirectly from the use of this product. The user shall observe safe and lawful practices including, but not limited to, those set forth in this document.

In the Box

Handwheel ×1

Communication Cable ×1
Introduction

The DJI Focus Handwheel enables users to control the aperture and focus of the OSMO™ Pro/RAW as well as zoom with precision and convenience.

[1] Focus Wheel
  Controls the Osmo Pro/RAW camera lens.

[2] Stiffness Control
  Adjusts focus wheel stiffness.

  Provides a marking scale.

  Adjustable hard stops limit the focus wheel travel range.
[6] Status LED/Backlight
Indicates Osmo Pro/RAW communication status and illuminates the marking ring from behind.

[7] DJI Rosette Mount
Mounting point on Osmo Pro/RAW.

[8] Communication Port
Connects to the Osmo Pro/RAW.

**Installation**

1. Attach the Focus Handwheel to the Osmo Pro/RAW as shown then tighten the screw.
2. Connect the Communication Port on the Focus Handwheel to the Osmo Pro/RAW for power supply and communication. Ensure the cable's orientation is correct before plugging into the ports.

The Status LED indicates the communication status of the Osmo Pro/RAW after it is powered on. Refer to the table below for more information about the blinking patterns.
## Status LED Description

<td>Upgrade failed.</td>
</tr>
<tr>
<td>Blinks slowly</td>
<td>No device detected</td>
</tr>
<tr>
<td>Solid on</td>
<td>Working properly</td>
</tr>
</tbody>
</table>

## Focus Wheel Settings

### Setting Mechanical Limits

The two adjustable hard stop screws around the focus wheel can be used to limit the travel range physically.

1. Loosen the hard stop screws, slide them to the desired positions and tighten.
2. The travel range of the focus wheel is now limited to the distance between the two hard stop screws.
Adjusting the Stiffness

Turn the control knob at the center while holding the focus wheel to adjust the stiffness of the wheel. Adjust the focus wheel until it reaches a stiffness or looseness that feels comfortable.

- The rotation direction of the Focus wheel can be reversed in the DJI GO app.
- The aperture, focus or zoom (subject to compatibility of the lens) control can be switched in the DJI GO app.

Calibration

Only calibrate the Focus Handwheel when you feel lens control is not optimal.

How to Calibrate

Within the first four seconds after powering on, rotate the Focus wheel back and forth across its full travel range four times.
Firmware Upgrade

The Focus Handwheel can be upgraded through the Osmo Pro/RAW. Please refer to the Osmo Pro/RAW Upgrade Guide for more information.
