

**2015.11.26**

Overview :

1. All-in-One Firmware Updated to : v1.2.0040

Bug Fixes :

1. Reduced purple fringing for RAW photos taken in HDR mode.
2. Fixed issue of abnormal aircraft movement in Follow Me mode whenever the mobile device GPS signal is weak.

Notes :

The remote controller' s firmware will be updated in this release. Ensure the remote controller is powered on and that your mobile device does not enter screen lock mode during the update.
