The default flight control is known as Mode 2. The left stick controls the aircraft’s altitude and heading, while the right stick controls its forward, backward, left and right movements. The gimbal dial controls the camera’s tilt.

Quick Start Guide

V1.0

The DJI PHANTOM 4 Pro V2.0 is a smart prosumer flying camera capable of shooting 4K video at 60 fps and up to 100 Mbps, and capturing 20 megapixel stills. 4 directions of obstacle avoidance allow it to intelligently avoid obstacles during flight. Using TapFly and ActiveTrack through the DJI GO app, you can fly anywhere visible on your screen or track a moving subject smoothly and easily with a simple tap. The camera uses a 1-inch CMOS sensor offering unprecedented clarity, lower noise, and better quality images.

In addition to the above features, improved propulsion system efficiency means aircraft noise is 4dB (60%) lower than on the Phantom 4 Pro V2.0.

Remote Controller

The powerful remote controller of the Phantom 4 Pro V2.0 has a transmission range extending up to 4.3 mi (7 km)*. It features physical buttons and dials to control exposure, camera tilt, photo capture, and video recording.

Built into the remote controller is DJI’s latest long-range transmission technology OCUSYNC, which when paired with a compatible mobile device gives you a live HD view from the Phantom’s camera. Dual frequency support makes the HD video downlink more stable.

* The remote controller is able to reach its maximum transmission distance (FCC) in a wide open area with no Electro-Magnetic Interference, and at an altitude of about 400 feet (120 meters).

The DJI PHANTOM™ 4 Pro V2.0 is a smart prosumer flying camera capable of shooting 4K video at 60 fps and at up to 100 Mbps, and capturing 20 megapixel stills. 4 directions of obstacle avoidance allow it to intelligently avoid obstacles during flight. Using TapFly™ and ActiveTrack™ through the DJI GO™ 4 app, you can fly anywhere visible on your screen or track a moving subject smoothly and easily with a simple tap. The camera uses a 1-inch CMOS sensor offering unprecedented clarity, lower noise, and better quality images.

In addition to the above features, improved propulsion system efficiency means aircraft noise is 4dB (60%) lower than on the Phantom 4 Pro V2.0.

Remote Controller

The powerful remote controller of the Phantom 4 Pro V2.0 has a transmission range extending up to 4.3 mi (7 km)*. It features physical buttons and dials to control exposure, camera tilt, photo capture, and video recording.

1. Gimbal and Camera
2. Downward Vision System*
3. Micro USB Port
4. Camera/Linking Status Indicator and Link Button
5. Camera Micro SD Card Slot
6. Forward Vision System
7. Infrared Sensing System*
8. Front LEDs
9. Motors
10. Propellers
11. Aircraft Status Indicators
12. Antennas
13. Rear Vision System
14. Intelligent Flight Battery
15. Power Button
16. Battery Level Indicators

* The Vision and Infrared Sensing Systems are affected by surrounding conditions. Read the Disclaimer and Safety Guidelines and watch the tutorials in the DJI GO 4 app or on the official DJI website to learn more.

Built into the remote controller is DJI’s latest long-range transmission technology OCUSYNCTM, which when paired with a compatible mobile device gives you a live HD view from the Phantom's camera. Dual frequency support makes the HD video downlink more stable.

Remote Controller

The default flight control is known as Mode 2. The left stick controls the aircraft’s altitude and heading, while the right stick controls its forward, backward, left and right movements. The gimbal dial controls the camera’s tilt.

Left Stick

Right Stick

Gimbal Dial

* The remote controller is able to reach its maximum transmission distance (FCC) in a wide open area with no Electro-Magnetic Interference, and at an altitude of about 400 feet (120 meters).
1. Download the DJI GO 4 App
Search for ‘DJI GO 4’ on the App Store or Google Play, and install the app on your mobile device.

2. Watch the Tutorial Videos
Watch the tutorial videos at www.dji.com or in the DJI GO 4 app.

3. Check the Battery Levels
Press once to check the battery level. Press once, then again and hold to turn on/off.

4. Charge the Batteries
Remove the battery. Charge Time: ~1 hr 20 min

- When charging is complete, the battery level indicators will automatically turn off.

- DJI GO 4 supports iOS 9.0 (or later) or Android 4.4 (or later).
5. Prepare the Remote Controller

Unfold

Press the button to release the clamp.

Place your mobile device and adjust the clamp to secure.

Connect your mobile device with a USB cable.

6. Prepare for Takeoff

Remove the gimbal clamp from the camera.

Power on the remote controller and the aircraft.

Launch DJI GO 4, complete the first-time setup, and tap GO FLY.

First-time activation requires your DJI account and internet connection.

Press the propeller down onto the mounting plate and rotate in the lock direction until secure.

Black propeller rings go on motors with black dots.

Silver propeller rings go on motors without black dots.

• Check that the propellers are secure before each flight.
7. Flight

**Ready to Go (GPS)**

Before taking off, make sure the Aircraft Status Bar in the DJI GO 4 app indicates ‘Ready to Go (GPS)’ or ‘Ready to Go (Vision)’ if flying indoors.

In the DJI GO 4 App:

- **Auto Takeoff**
  The aircraft will take off and hover at an altitude of 4 feet (1.2 meters).

- **Auto Landing**
  The aircraft will land vertically and stop its motors.

- **Return-to-Home (RTH)**
  Bring the aircraft back to the Home Point. Tap again to stop the procedure.

- **Normal**
  You are in control of the Phantom, with satellite and Return-to-Home support.

- **TapFly**
  Tap on your screen to fly your Phantom in that direction, avoiding obstacles as it flies.

- **ActiveTrack**
  Mark an object on your screen to track it as it moves.

- **Manual Takeoff**
  Left stick up (slowly) to take off
  Combination Stick Command to start/stop the motors

- **Manual Landing**
  Hold a few seconds to stop the motors
  Left stick down (slowly)

- **Stop motor mid-flight**: Pull the left stick to the bottom inside corner while simultaneously pressing the RTH button. Only stop motors mid-flight in emergency situations when doing so can reduce the risk of damage or injury. Refer to the user manual for details.

- **It’s important to understand basic flight guidelines, for the safety of both you and those around you. Don’t forget to read the Disclaimer and Safety Guidelines.**
4. Charge the Batteries

1. Download the DJI GO 4 App

Using Phantom 4 Pro V2.0 device.

2. Watch the Tutorial Videos

in the DJI GO 4 app. Before taking off, make sure the Aircraft Status Bar in the DJI GO 4 app.

3. Unfold Press the button to

Release the clamp.

4. Check that the propellers are secure

Before taking off.

5. Prepare the Remote Controller

First-time activation requires your DJI account and internet connection.

6. Go Fly

Launch DJI GO 4, complete the first-time setup, and tap

7. Flight

In the DJI GO 4 App:

- Ready to Go (GPS)
- Ready to Go (Vision) if flying indoors.
- Normal
- Auto Takeoff
- Burst Shooting
- Interval: 2/3/5/7/10/15/30/60 s
- Burst Shooting: 3/5/7/10/14 frames
- Still Photography Modes: Single Shot
- Example Shutter speeds: 
  - Interval: 2/3/5/7/10/15/30/60 s
  - Burst Shooting: 3/5/7/10/14 frames
  - Auto Exposure Bracketing (AEB): 1/3/5/7/10/14 frames

Specifications

- **Aircraft**
  - Weight (Battery & Propellers Included): 1375 g
  - Max Ascent Speed: S-mode: 6 m/s, P-mode: 5 m/s
  - Max Descent Speed: S-mode: 4 m/s, P-mode: 3 m/s
  - Max Speed: 45 mph (72 kph) (S-mode); 36 mph (58 kph) (A-mode);
    31 mph (50 kph) (P-mode)
  - Max Service Ceiling Above Sea Level: 19685 ft (6000 m)
  - Max Flight Time: Approx. 30 minutes
  - Operating Temperature: 32° to 104° F (0° to 40° C)
  - GNSS: GPS+GLONASS
  - Operating Frequency: 2.400 - 2.483 GHz and 5.725 - 5.850 GHz
  - Transmitter Power (EIRP): 2.4 GHz: ≤26 dBm (FCC); ≤20 dBm (CE); ≤20 dBm (SRRC)
    5.8 GHz: ≤26 dBm (FCC); ≤14 dBm (CE); ≤26 dBm (SRRC)
  - Hover Accuracy Range
    - Vertical: ±0.1 m (With Vision Positioning); ±0.5 m (With GPS Positioning)
    - Horizontal: ±0.3 m (With Vision Positioning); ±1.5 m (With GPS Positioning)
  - **Vision System**
    - Velocity Range: ≤31 mph (50 kph) at 6.6 ft (2 m) above ground
    - Altitude Range: 0 - 33 ft (0 - 10 m)
    - Operating Range: 0 - 33 ft (0 - 10 m)
    - Obstacle Sensory Range: 2 - 98 ft (0.7 - 30 m)
    - Operating Environment: Surfaces with clear patterns and adequate lighting (> 15 lux)
  - **Infrared Sensing System**
    - Obstacle Sensory Range: 0.6 - 23 ft (0.2 - 7 m)
    - Operating Environment: Surface with diffuse reflection material, and reflectivity > 8% (such as wall, trees, humans, etc.)
  - **Camera**
    - Sensor: 1" CMOS; Effective pixels: 20M
    - Lens: FOV (Field of View) 84°, 8.8 mm (35 mm format equivalent: 24 mm); (2.8 - f/11, auto focus at 1 m - ∞
    - ISO Range: Video: 100 - 3200 (Auto); 100 - 6400 (Manual); Photo: 100 - 3200 (Auto); 100 - 12800 (Manual)
    - Mechanical Shutter: 8 - 1/2000 s
    - Electronic Shutter: 8 - 1/8000 s
    - Still Photography Modes: Single Shot
    - Burst Shooting: 3/5/7/10/14 frames
