Disclaimer and Warning

Congratulations on purchasing your new DJI™ product. The information in this document affects your safety and your legal rights and responsibilities. Read this entire document carefully to ensure proper configuration before use. Failure to read and follow instructions and warnings in this document may result in serious injury to yourself or others, or damage to your DJI product or damage to other objects in the vicinity. This User Manual and all other collateral documents are subject to change at the sole discretion of DJI. For up-to-date product information, visit http://www.dji.com and click on the product page for this product.

By using this product, you hereby signify that you have read this disclaimer and warning carefully and that you understand and agree to abide by the terms and conditions herein. You agree that you are solely responsible for your own conduct while using this product, and for any consequences thereof. You agree to use this product only for purposes that are proper and in accordance with all applicable laws, rules, and regulations, and all terms, precautions, practices, policies and guidelines DJI has made and may make available.

DJI accepts no liability for damage, injury or any legal responsibility incurred directly or indirectly from the use of this product. The user shall observe safe and lawful practices including, but not limited to, those set forth in this User Manual.

Using this Manual

Legend

⚠️ WARNING ⚠️ Warning: Failure to properly follow procedures may result in property damage, collateral damage, and serious or superficial injury.

⚠️ CAUTION ⚠️ Caution: Failure to properly follow procedures may result in property damage and serious injury.

⚠️ NOTICE ⚠️ Notice: Failure to properly follow procedures may result in property damage, a small possibility of injury, or no possibility of injury.

☀️ TIPS ☀️ Tips
Introduction

The DJI SRW-60G is a short range wireless video link, which can transmit real time HD video or images for up to 10 meters. Containing both a transmitter and a receiver, it is not only suited for the Ronin-MX and Matrice 600, but can also be used with the Ronin series of handheld gimbals. Convenient video transmission in a meeting room or at home are also a breeze with the SRW-60G.
SRW-60G Diagram

Transmitter

1. HDMI Port
   For connecting to the HDMI output for HDMI transmission.

2. Gimbal Mounting Adapter
   For mounting to a Ronin-MX or Ronin-M. The adapter can be removed when not used with the Ronin-MX or Ronin-M.

3. Cable Slot
   For fastening the cable in position.

4. Link Button
   For linking to the Receiver.

5. Micro USB Port
   For firmware upgrades and power supply.

Receiver

1. Micro USB Port
   For firmware upgrades and power supply.

2. Power Port
   For power supply.

3. HDMI Port
   For connecting to HDMI input for HDMI transmission.

4. Aircraft Mounting Adapter
   For mounting the Receiver to aircraft. The adapter can be removed.

5. Status LED
   Indicates the communication status with the Receiver.

6. Power Port
   For power supply.

7. Status LED
   Indicates the communication status with the Transmitter.
Usage

Using the SRW-60G with the Ronin-MX and Matrice 600

1. Loosen the screw of the clamp on the gimbal mounting adapter of the Transmitter. Then attach the Transmitter to the arm of the Ronin-MX and tighten the screw.

2. Link the HDMI Ports of the Transmitter and the camera by using a soft and flexible HDMI cable (not provided).

3. Connect the Power Port on the Transmitter to the CAN1 Port (or the USB port) of the Ronin-MX by using the provided transmitter power cable.

NOTICE

- In order to avoid obstructing any gimbal movements, the cables can be attached in the cable slot.
4. Attach the Receiver to the bottom of the Matrice 600 next to the aircraft’s nose as shown below. Then tighten the M3×5.5 screws.

5. Connect the HDMI Port on the Receiver and the HDMI cable port of the Matrice 600.

6. Connect the Power Port of the Receiver and any CAN port on the Matrice 600 by using the provided receiver power cable.
**WARNING**

- Ensure the Transmitter and Receiver are mounted securely.
- Ensure all the cables do not obstruct the gimbal or the aircraft’s movements.
- For users of the Matrice 600 and Ronin-MX in the United States, Federal Communications Commission (FCC) regulation prohibits the operation of unlicensed devices transmitting in the 57-64 GHz on aircraft or satellites. The SRW-60G operates on an unlicensed basis in the 57-64 GHz band.

**NOTICE**

- Ensure both the Transmitter and Receiver are not obstructed during use.

---

Using the SRW-60G with a Ronin Series Gimbal

1. Follow the steps above to mount the Transmitter on a Ronin-MX or Ronin-M.

2. If using a Ronin, remove the gimbal mounting adapter and stick the Transmitter onto the Ronin or your camera.

3. Remove the aircraft mounting adapter and mount the Receiver in place.

**NOTICE**

- Ensure both the Transmitter and Receiver are not obstructed during use.
Using the SRW-60G in a Meeting Room or at Home

1. Remove the gimbal mounting adapter and aircraft mounting adapter.
2. Connect the HDMI output and input to the Transmitter and Receiver separately.
3. Connect the USB ports on both the Transmitter and Receiver to an external power supply.

**NOTICE**
- The USB port operation voltage is 5 V (DC).

**Linking**

The Transmitter is linked to the Receiver before delivery. Linking is only required when using a new Transmitter or Receiver. Ensure the Transmitter and Receiver are properly connected to the HDMI device before linking to avoid failure.

**How to link**

Press the Link button on the Transmitter once. The linking process will complete in approximately 10 seconds.

**FCC Compliance Notice**
This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation.
Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

**RF Exposure Information**
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, human proximity to the antenna shall not be less than 20cm during normal operation.

**IC RSS Warning**
This device complies with Industry Canada licence-exempt RSS standard (s). Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device.
Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence.
L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
IC Radiation Exposure Statement:
This equipment complies with IC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.
