DJI Smart Controller Release Notes

Date:	2019.02.01
Smart Controller Firmware:	v01.00.0360
DJI GO 4 App:	v4.3.12
DJI Assistant 2:	DJI Assistant 2 For Mavic v2.0.6

What´s New?

- Added German and Spanish languages to the system. Users can set the system language in settings.
- Optimized the button combinations. To use a button combination, users now only need to hold the back button and then press the other button.
- Optimized the UI and descriptions for the tips section.
- Optimized the overall user experience of the Smart Controller.
- Updated the built-in DJI GO 4 app to v4.3.12, which includes the new Waypoints feature.

Notes:

- To ensure optimal performance, it is recommended to update the Smart Controller to the latest firmware version.
- If update fails, set the external microSD card to "Use as portable storage" from "Use as internal storage", and remove the microSD card, and then retry to update. Contact DJI support if update fails for several times.
- It is not recommended to set the external microSD card to "Use as internal storage". This setting will be optimized in future firmware.
