

# DJI CineLight Release Notes

## 2016.04.22

1. DJI CineLight upgraded to v0.9.17

### Major Updates

1. Boosted GUI response and playback speed by introducing a self-adaptive resolution rendering feature.
2. Added implementation of Warp Rectilinear for DNG format. Enable this feature by clicking through **Calibrations > DNG > Warp Rectilinear**.
3. Fixed the issue of DJI CineLight crashing upon initialization.
4. Fixed the issue of DJI CineLight crashing when removing the X5R SSD from the aircraft.

### Notes

- Adjust the preview scale to 100% or above to examine footage details, as the preview resolution is modified automatically by the self-adaptive rendering feature.
